

# ALEXANDRA KERVEFORS

Hello! I'm Alexandra Kervefors, a young woman from Stockholm, Sweden, passionate about developing video games!

While I initially studied Marine Biology at Stockholm University, I realized it wasn't the right fit for me. Having always enjoyed playing video games, I decided to pursue a career in the gaming industry, focusing on level design and world level design.

My goal is to create video games with immersive experiences and enjoyable designs for everyone. I've gained valuable work experience at Coffee Stain Studios and held part-time service jobs, developing efficient teamwork skills and the ability to handle stress with patience.
